PROFESSIONAL SUMMARY

B.Tech Computer Science student and AI/Machine Learning developer with hands-on experience in Python, data curation, and machine learning model development. Skilled in building data-driven applications using Pandas, NumPy, Scikit-learn, and Streamlit, with additional experience in full-stack web development. Completed 15+ projects spanning data science, computer vision, and web applications, with a strong foundation in translating real-world data into actionable insights.

EXPERIENCE

Data Science Trainee — Meander Software Pvt. Ltd.

Jan 2026 – July 2026

On-site

- Worked with real-world datasets to support machine learning model development and analysis.
- Built and evaluated machine learning models using Python, Pandas, NumPy, and Scikit-learn.
- Created data visualizations to communicate trends and insights to stakeholders.
- Studied and applied deep learning concepts using TensorFlow to extend model capabilities.

Data Science Using Python — Smarted Innovations

Sep 2025 – Nov 2025

Remote

- Performed data preprocessing and cleaning on raw datasets to prepare them for analysis.
- Built predictive models and analyzed real-world datasets to identify patterns and trends.
- Utilized Pandas, NumPy, Matplotlib, and Scikit-learn to generate insights and visual dashboards supporting data-driven decisions.

Fundamentals of Data Curation Using Python — NIELIT Ropar

June 2025 – July 2025

On-site

- Performed data curation and preprocessing using Python to ensure high-quality, well-structured datasets.
- Utilized Pandas and NumPy to clean, organize, and transform raw data, maintaining accuracy and consistency for analysis and reporting.

PROJECTS

Automatic Resume Parser — Python, Angular, FastAPI, Google Gemini API, ChromaDB

[Demo](#)

- Built a resume parsing and candidate matching system that extracts skills, education, and experience from resumes using Google Gemini AI and performs semantic search using ChromaDB for efficient recruitment.

Skincare Recommendation System — Python, Pandas, NumPy, Matplotlib, Scikit-learn, Streamlit

[Demo](#)

- Developed a skincare recommendation system that analyzes user skin type and concerns to suggest personalized skincare products using data-driven techniques.

Virtual Keyboard — Python, JavaScript, HTML, CSS

[Demo](#)

- Built an on-screen virtual keyboard experience with both a web-based interface (JavaScript, HTML, CSS) and a Python implementation, designed for touch and accessibility-friendly input.

Face Mask Detection — Python, OpenCV, Machine Learning

[Demo](#)

- Built a computer vision project that detects whether a person is wearing a face mask in real time.

TRAINING & CERTIFICATIONS

- Fundamentals of Data Curation Using Python — NIELIT Ropar (Recognized by NCVET), 2025
- Data Science with Python — Smarted Innovations, 2025
- Data Analysis with Python Developer — freeCodeCamp
- HTML, CSS & JavaScript — Udemy, 2024
- Introduction to Model Context Protocol (MCP) — Anthropic

EDUCATION

B.Tech, Computer Science and Engineering — Government P.G. College, Dharamshala

GPA: 7.54

Sep 2022 – May 2026

12th Class (Non-Medical) — GSSS Daroh

Percentage: 96.8%

Apr 2021 – Mar 2022

TECHNICAL SKILLS

Languages & Core : Python, Machine Learning, HTML5, CSS3, JavaScript

Frameworks : Flask, React, Streamlit

Machine Learning : Scikit-learn, TensorFlow, Keras, Model Evaluation, Data Analysis

Libraries : Pandas, NumPy, Matplotlib, Seaborn, OpenCV

Developer Tools : Git, GitHub, Hugging Face, Render, VS Code, Jupyter, MySQL, Excel
