EDUCATION

Government P.G. College Dharamshala

B.Tech Computer Science and Engineering *GPA: 7.37*

Dharamshala
September 2022 - May 2026

Government Senior Secondary School Daroh

12th Class Non-Medical *GPA: 96.8*

Kangra
April 2021 - March 2022

EXPERIENCE

NIELIT Ropar

Fundamentals of Data Curation Using Python

Ropar
June 2025 - July 2025

- Performed data curation and preprocessing using python to ensure high-quality, well-structured datasets. Utilized libraries such as Pandas and Numpy to clean, organize, and transform raw data, maintaining accuracy, consistency, and readiness for analysis and reporting.

Smarterd Innovation

Data Science using Python

Online
September - November

- Worked on data analysis and modeling using Python by cleaning, preprocessing, and analyzing datasets. Utilized libraries such as Pandas, NumPy, Matplotlib, and Scikit-learn to identify patterns, build basic models, and generate insights to support data-driven decisions.

Udemy

HTML, CSS and JAVASCRIPT

Online
June 2024 - July 2024

- Developed and maintained responsive web pages using HTML, CSS and Javascript. Implemented clean layouts, styling and interactive features while ensuring cross-browser compatibility, performance optimization and adherence to web standards for an improved user experience.

PROJECTS

Skincare Recommendation System *Python, Pandas, Numpy, Matplotlib, scikit-learn, Streamlit*

Developed a skin care recommendation system that analyzes user skin type and concerns to suggest personalized skincare products using data driven techniques.

Book Recommendation System *Python, Pandas, Numpy, Scikit-learn, Matplotlib, Streamlit*

Built a collaborative filtering-based system that analyzes user-book interactions and ratings to recommend similar books, enabling personalized suggestions and improving book discovery efficiency.

Amazon Clone Frontend *HTML, CSS*

Designed and developed a responsive Amazon Clone frontend using modern web technologies. Implemented core UI features such as product listings, navigation bar, search layout, cart interface, and responsive design to closely replicate the user experience of Amazon.

Car Price Predictor *Python, Pandas, Numpy, Matplotlib, Streamlit*

Developed a machine learning-based Car Price Prediction system that analyzes vehicle features such as brand, model, year, mileage, and fuel type to estimate accurate market prices, helping users make informed buying and selling decisions.

House Price Predictor *Python, Pandas and Numpy, Matplotlib, Scikit-learn*

Built a machine learning-based House Price Prediction model that analyzes key property features such as location, area, number of rooms, and amenities to estimate accurate housing prices, supporting data-driven real estate decisions.

TECHNICAL SKILLS

Languages: Python, C++, Java, HTML/CSS

Framework: Flask, Streamlit, Tensor Flow

Developer Tools: Git, Github, Hugging Fcae, Render, VS Code, Excel

Libraries: Pandas, Numpy, Matplotlib, Seaborn, scikit-learn, OpenCv
